Re: Ryan Cole, MD

TO WHOM IT MAY CONCERN:

I was absolutely stunned and infuriated to learn about the Complaint filed by the Idaho Medical Association against Ryan Cole, MD, Idaho Board of Medicine physician license #M-8883. I personally believe that Dr. Ryan Cole is a true American Hero, and one of the most scientific trustworthy people in the United States.

The State of Idaho and the Idaho Medical Association should be proud to Dr. Cole in the state. Instead, his work informing the people of America and the world is thwarted while he spends time and effort hiring lawyers to defend himself against your harassing Complaint.

Dr. Cole is a beacon of truth and light for millions of people, and his reward is harassment by a Complaint based on unfounded and absurd claims? For one thing, the Complaint focuses on Dr. Cole prescribing Ivermectin to his patients.

It seems so ridiculous that a layperson with no medical training such as me can spend 15 minutes and easily research away any foundation for your "Ivermectin claims" against Dr. Cole. For instance:

First, a [2021 publication of the National Institutes of Health](#) reported that a two-dose Ivermectin prophylaxis was associated with a massive (72%) reduction in Covid-19 infection in healthcare workers in India.

Many, many countries are [successfully treating Covid-19 with Ivermectin](#). [Slovakia approved Ivermectin](#) for both preventative use and treatment of Covid'19. [India experienced a 97% decline in Covid-19 cases in a five week](#) period when Ivermectin was introduced as early treatment. [The Tokyo Medical Association declared Ivermectin safe in February, 2021](#) for Covid-19 and stated it should be widely used by Japanese physicians.

[Furthermore, Japan recently dropped the rollout](#) of the leaky “vaccines” in favor of Ivermectin with stunning success. I

I could go on, but I hope you get the point. The medical system is seemingly controlled. Open your eyes. Medical professionals that refuse to use their brains and continue to follow the narrative that there is no early and effective treatment are criminals. It’s so disconcerting. Shame on you. The Complaint against Dr. Cole should be immediately dropped and replaced with an apology.
